

Technical Conference – Breakout Session Report Out

TOPIC: Workable regulations when
the grid arrives

Facilitator/Expert: Chris Greacen

Topic: Workable Regulations/what happens when the main grid arrives

- Top most urgent/important issue to resolve:
 - Lack of business models

Solutions

Issue: Lack of business models

Solution A: creation of regulatory framework /enabling environment

- What can government do?
 - Create the appropriate regulation that works for all
 - Appropriate feed in tariffs or other mechanisms (auctions)
 - Help to create best case experiences
 - Clarify issues around compensation
- What can private sector (developers/financiers) do?
 - Explain clearly their needs to make the business viable and sustainable in the long term
- What can donors do?
 - Help produce standardized documents
 - cover the risk of private sector when the grid arrives before the investments costs are fully recovered.
