

SE4ALL Technical Assistance Program (S-TAP)

Dr. Venkata Putti
ESMAP

ESMAP Knowledge Exchange Forum
The Hague
21 November 2013

Country Action Process

Expected Outcomes of Country TA

- ***National Energy Action Plan***
 - A roadmap for 2030
 - Builds on existing plans and programs
 - Identifies gaps to be filled to achieve 2030 goals
- ***Investment Prospectus***
 - Identifies specific projects and programs
 - Estimates investment requirements
 - Mobilizes investments
- ***Enabling Environment***
 - Policy/regulation
 - Capacity building
 - Innovative business and institutional models
 - Access to finance
 - Technology transfer

SUSTAINABLE
ENERGY FOR ALL

ESMAP's S-TAP

- The development objective of S-TAP is “to support the expansion of access to modern energy services to at least 200 million people by 2030”
- ESMAP aims to assist about 20 countries towards this objective
- The first tranche with \$15m focuses on 7 countries and 2 regional initiatives

SUSTAINABLE
ENERGY FOR ALL

Country Action

S-TAP Coverage

Country/Region	Focus
Burundi	Electricity, Clean Cooking
Mozambique	Electricity, Clean Cooking
Guinea	Electricity
Liberia	Electricity
Senegal	Electricity, Clean Cooking
Myanmar	Electricity
Nepal	Clean Cooking
Central America	Clean Cooking
Africa Regional Power Pools	Capacity Strengthening

Range of Activities

	Burundi	Guinea	Liberia	Mozambique	Senegal
Investment planning	Investment Prospectus (Least cost grid network expansion plan) Pre-Feasibility Study for Network Extension	Development of Investment Prospectus	Energy Sector Planning Development of Investment Prospectus	Investment Prospectus	RE investment prospectus and funding strategy

Monitoring systems	M&E capacity building	Capacity Building and Knowledge Sharing on sector monitoring and evaluation		Target setting and data management	
Other thematic activities	Household Fuels Lighting for bottom of the pyramid		Renewable Energy Program		RE sector strengthening

Current Status

- **SE4ALL activities have kicked off in all S-TAP countries:**
 - including local engagement of relevant government entities and the development partners.
 - donor coordinating mechanism is being used where it exists, and where not, the SE4ALL TA has created a new coordinating mechanism (e.g. Guinea)
- **Senegal:** strong endorsement from new Minister of Energy in Senegal (Ministry has a strong focus on rural electrification and sees S-TAP as a platform for progress). Procurement is underway for studies of two rural electrification concessions
- **Guinea:** new World Bank staff started in September 2013, bringing solid experience from leading SWAp program in Rwanda. Procurement underway for PPP activity on hydro development
- **Burundi:** focus on private sector investment in the energy sector, including a review of the electricity law and agreement to develop a standard PPA framework

Current Status

- **Liberia:** review of draft energy law and preparation for 4-6 prefeasibility studies under way
- **Mozambique:** in the process of getting a consultant activated to kick off activities
- **Myanmar:** First national workshop held in May 2013; Procurement for Least Cost Plan and Investment Prospectus under way
- **Nepal:** Support to National Clean Cooking Program to achieve universal access by 2017; Scope of TA under discussion with AEPC
- **Central America:** Initial focus on investment prospectus in 3 countries
- **Africa regional activity has started with the flagship report on regional energy trade.**
 - The EOI has been issued with very strong interest shown (more than 30 firms).
 - RFPs to be issued with execution expected to begin in Q1 2014
