BIOS OF SPEAKERS

Emmanuelle Auriol is professor of Economics at Toulouse School of Economics and since 2004 a fellow of CEPR and, a member of the Council of the EEA. Her research interests include industrial organization, regulation, labor economy, and collective decision making. She studies government conduct and performance with a special focus on developing economies. She relies on cross-countries analysis to derive policy recommendations on industrial organization issues such as privatization, regulation or markets design. Since in practice policy implementation matters as much as policy design, she also studies government organization. She received several grants and awards for her publications. Professor Auriol extensive publications include articles in The RAND Journal of Economics, American Economic Review, International Journal of Industrial Organization, Utilities Policy, The Journal of Public Economics, The Journal of Labor Economics, and The Economic Journal.

Paul A. Grout is Professor of Political Economy and Head of Economics at the University of Bristol and a Co-Director of the Leverhulme/ESRC Centre for Market and Public Organisation at the University. He has published extensively on regulation, privatisation, competition policy, law and economics, and financial economics. Recent academic papers include articles on regulation and law and economics in the Journal of Financial Economics, RAND Journal of Economics, Economic Journal, European Economic Review, Journal of Competition Law and Economics, European Competition Law Annual, and the American Bar Association’s handbook on competition law. Professor Grout has considerable experience in advising government departments and companies on regulation, competition law and financial issues. Recent and ongoing regulation/finance/competition consultancies for official bodies include Competition Commission, OFT, Ministry of Justice, European Investment Bank, and Ofgem. He has also consulted widely for UK, European and US regulated companies in the water, electricity, gas, telecommunications and media sectors.

Tooraj Jamasb is SIRE Chair in Energy Economics at Heriot-Watt University. Prior to this appointment, he was a Senior Research Associate at the Faculty of Economics, University of Cambridge. He has worked on a number of international and UK energy research projects. In addition he has worked as consultant with the World Bank, Council of European Energy Regulators (CEER), and European electricity regulators. He is a life-member of Clare Hall college, University of Cambridge. Professor Jamasb’s research interests include regulation and liberalization of energy markets, efficiency/productivity analysis and benchmarking, energy sector in developing countries, demand-side and public acceptance of energy, energy technology and innovation policy analysis. Professor Jamasb has extensive publications on these topics including articles in Review of Industrial Organization, Applied Economics, Energy Policy, and The Energy Journal.

Jaime Millán is the former Principal Energy Economist in the Infrastructure and Financial Markets Division of the Inter-American Development Bank’s Sustainable Development Department, where he was in charge of coordinating activities and strategies related to the IADB’s Energy Policy and conducted research on the sustainability of power sector reform in Latin America and the Caribbean. During his career in the IADB he had supervised the economic inputs of energy projects, drafted public utilities policy and energy strategy, and initiated a program on sustainable energy. He has more than 35 years of experience of working on the Latin American electricity sector. His publications include a number of articles and books on “Market of State? Three Decades of Reforms in the Latin American Electric Power Industry” (IADB, 2007) and “Keeping the Lights on: Power Sector Reform in Latin America” (IADB, 2003). His other professional experiences include being an official of a state utility, and an academic in Colombia.

Russell Pittman is Director of Economic Research and Director of International Technical Assistance in the Economic Analysis Group, Antitrust Division, U.S. Department of Justice. He is also a visiting professor at the New Economic School, Moscow. His 1983 paper in the Economic Journal on the measurement of productivity in the presence of undesirable outputs is considered the seminal paper on that topic. Dr. Pittman consults regularly with antitrust enforcers and economic reformers in transition
and developing economies, most recently with the Federal Antimonopoly Service in Russia, the Romanian Competition Council, and the Indonesian KPPU. He also served on the team of experts for the Russian Regulatory Reform Review carried out by the OECD. Dr. Pittman earned his Ph.D. in economics from the University of Wisconsin in 1979.

**Pasquale Cirillo** is Lecturer and Fellow in Econometrics and Applied Micro Statistics, in the Department of Economics of the University of Bern. He holds a PhD in Statistics from Bocconi University. His research interest include econometric and industrial statistics, Risk analysis and Applied Probability. He has published extensively in journals including *International Journal of Theoretical and Applied Finance, Journal of Economic Behavior and Organization, Economics Bulletin.*
